Date: _____

The latest developments in the school

To further enhance the effectiveness of learning and teaching, our school participated in the following support programs in the new academic year :

1. "Support Programme on Fostering Communities of Practice to Enhance Small Class Teaching" organized by the Education University of Hong Kong (Chinese)
2. Dr. Tang Wei-Sin School-based English Language Support Service (English)
3. "Jockey Club CoolScience Programme" organized by the Education University of Hong Kong (Science)
4. Education Bureau National Education Learning Circle (2026/27 Academic Year)
5. Tiered Autism Intervention Model (AIM) Project organized by the Education Bureau

School report, July & August

1. Teacher Professional Development
 - a. Following a vote by all students and teachers, Mr. Yiu Wai Lun and Ms. Kwok Mai Ze have been nominated as the commended teachers of the 31st Teachers' Commendation Scheme. They will attend the Teachers' Day Celebration and Commendation Certificate Presentation Ceremony on 12th September, 2026.
 - b. Mr. Ho Hing Wing received an award at the 2025-2026 'Outstanding Teaching Staff, Enthusiastic Parents, and Most Improved Students' Commendation Ceremony organized by the Federation of Parent-Teacher Associations of Kwai Tsing District. We would like to thank Mr. Ho for his contributions to cultivating students' conduct.
2. Holistic Development of students
 - a. The school organized a Xi'an and Dunhuang study tour from 27th June to 2nd July. During the tour, students visited the Ming Dynasty Bell Tower and Drum Tower in Xi'an, the Museum of Qin Terra-cotta Warriors and Horses, and the Xi'an Ancient City Wall. They also visited the Mogao Caves in Dunhuang, participated in an exchange with our sister school, Dunhuang Nanjie Primary School, and toured the Yangguan Pass Relics Park, Yadan National Geological Park, Mingsha Mountain, and Crescent Lake. The students benefited greatly from the experience, witnessing firsthand the grand Chinese civilization and Silk Road legends they have read about in history books.
 - b. On 6th July, the school held its internal Graduation Ceremony and the Graduating Class Thanksgiving Tea Reception. On that day, the School Supervisor, Mr. Chu Tak-wing, MH, officiated the ceremony, presented the certificates, and delivered a speech of encouragement. The School Managers presented academic achievement awards, improvement awards, and conduct scholarships for all levels. Immediately following the Graduation Ceremony, the school held a Thanksgiving Tea Reception for the graduates to express their gratitude to their teachers. Teachers and students reminisced together about the fun moments and traces of growth they shared on campus over the past six years. The graduates even sang in unison, conveying their appreciation for their teachers with sincere and moving voices. The scene was truly touching.
 - c. Congratulations to this year's graduates on their ideal Secondary School Places Allocation (SSPA) results. On 7th July, Primary 6 students received the great news regarding their SSPA results: 88% of the students were allocated to their first-choice schools, and 98% were allocated to their top three choices, both of which are higher than the territory-wide percentages.
 - d. The school participated in the 'Table Tennis Players into Campus × The Education University of Hong Kong Table Tennis Education Promotion Scheme'. Table tennis players from The Education University of Hong Kong visited our school in June and July to encourage students to actively participate in table tennis activities. Olympic medalist Lee Ho Ching and various coaches taught the racket-swinging movements and patiently corrected each student's posture. At the graduation ceremony of the promotion scheme on 12th July, in addition to Lee Ho Ching, Olympic medalist and current Hong Kong Table Tennis Team member Doo Hoi-kem, as well as

former Hong Kong Team member and artist Ruco Chan, were also in attendance. The students were all extremely excited.

- e. To enable students to make good use of their free time and broaden their horizons during the summer holidays, the school arranged various summer activities for students to participate in during July. These included a pickleball experience class, a parent-child emerging sports day, a visit to the Space Museum, a Chinese Herbal Medicine AI Planting and Wellness Study Tour, and a trip to Ocean Park. The students gained a wealth of knowledge and joy, and enjoyed a delightful time.
- f. From 20th July to 7th August, the school organized 22 summer training classes, including a Native English Teacher Playgroup, judo experience, table tennis, fancy rope skipping, gymnastics, African drum, football, Chinese dance, board games, and handicrafts. The activities covered different areas, allowing children to develop multiple intelligences and achieve balanced physical and mental development.
- g. At the invitation of Zhuhai Xiangyi Aviation Technology Co., Ltd., the school arranged for students to travel to Zhuhai from 20th to 24th July to participate in the 'China Southern Airlines Xiangyi Navigator Training Camp' to deepen their understanding of aerospace technology. The students learned about the development history of aerospace enterprises. Mr. Wang Yi, a current manned space engineering expert, taught in person and shared his experiences of living in space, allowing students to understand the astronaut selection process and China's exploration history of the moon and Mars. Flight instructors also explained aircraft structures and flight principles, and students had the opportunity to visit a flight simulator to experience the pilot's flying perspective firsthand. They also visited AVIC General Huanan Aircraft Industry Co., Ltd. to get a close look at the AG600 amphibious aircraft and two-seater single-engine aircraft, and conducted simulated flights to experience the pilot's complete operating procedures from takeoff to landing. Furthermore, the students attended a popular science lecture given by an engineer to gain a deep understanding of the technical characteristics and practical applications of satellite AI drones. The training camp inspired the students to embrace their aerospace dreams and bravely explore a future full of possibilities.
- h. From 26th to 28th August, the school held adaptation classes for prospective Primary 1 students. The students interacted with the Chinese, English, and Mathematics teachers to understand their requirements for each subject, enabling the students to adapt to primary school campus life as quickly as possible.

3. Home-school Cooperation

- a. On 26th August, the school held a new student parents' meeting for the parents of Primary 1 and transfer students. This allowed parents to familiarize themselves with the routines of our school life and understand the schedule and details regarding their children's learning, activities, lunch, and rest periods at school, enabling them to better prepare and cooperate with the school.
- b. Congratulations to Ms. Ng Man Fong, parent of Lam Yi Lee from Class 2C, on receiving the Enthusiastic Parent Award at the 2025-2026 'Outstanding Teaching Staff, Enthusiastic Parents, and Most Improved Students' Commendation Ceremony organized by the Federation of Parent-Teacher Associations of Kwai Tsing District. We also congratulate Ibraheem Muhammad from Class 3A on winning the Most Improved Student Award.
- c. Schools continuously review the annual parent survey data collected to understand parents' opinions on the amount of homework at math schools. Over the years, the vast majority of parents have said that the amount of homework at math schools is appropriate and moderate. If any parent feels their child has difficulty completing their homework, please express it to the school through the class teacher to negotiate the most effective way to help your child learn and grow.

4. Students' achievement

The school congratulates the students who have achieved excellent results in all competitions and wishes that they will make further progress. Turning over a new leaf, the new school year began. The school welcomes all new members. It is essential for students including the graduating ones to set a goal for this year's study and strive towards the goal. Students who graduated last year achieved exceptional results in the distribution of Secondary School-Places Allocation. Students are expected to strive their best and achieve prominent results this year. Last but not least, let us set our own goals and work hard to achieve them.
